10.	02/05/25	GitHub: Project Structure & Naming Conventions.

Exp.No: 1	AZURE DEVOPS ENVIRONMENT SETUP
Date:22/01/2025	

AIM: To set up and access the Azure DevOps environment by creating an organization through the Azure Portal.

INSTALLATION

1. Open your web browser and go to the Azure website: <https://azure.microsoft.com/en-us/getstarted/azure-portal>.

Sign in using your Microsoft account credentials.

If you don't have a Microsoft account, you can create one here: <https://signup.live.com/?lic=1>

Check out the how-to video series for tips on deploying your cloud workloads from the Azure portal. >

Azure mobile app

Stay connected to your Azure resources—anytime, anywhere. Now available for iOS and Android.

[Learn more >](#)

2. Azure home page

The screenshot shows the Microsoft Azure home page. At the top, there's a search bar and a user profile icon. Below the header, a "Welcome to Azure!" message is displayed, followed by three promotional cards: "Start with an Azure free trial", "Manage Microsoft Entra ID", and "Azure for Students". Under "Azure services", there are icons for Create a resource, Azure DevOps organizations, Tenant properties, Subscriptions, Quickstart Center, Azure AI services, Kubernetes services, Virtual machines, App Services, and More services. A "Resources" section is also visible.

3. Open DevOps environment in the Azure platform by typing **Azure DevOps Organizations** in the search bar.

The screenshot shows the Microsoft Azure home page with a search bar containing the text "Azure devops organization". A search results overlay is displayed, listing "Services" such as Azure DevOps organizations, Azure Cosmos DB, Azure Database for MySQL servers, and Azure Arc. It also lists "Documentation" sections for Organization Class, Use service principals & managed identities - Azure DevOps, Organization interface, Delete or remove an organization - Azure DevOps Services, and Continue searching in Microsoft Entra ID. The overlay includes a "Give feedback" button. The rest of the page layout is similar to the first screenshot, showing the "Welcome to Azure!" message and various service icons.

4. Click on the **My Azure DevOps Organization** link and create an organization and you should be taken to the Azure DevOps Organization Home page.

AZURE DEVOPS PROJECT SET UP AND USER STORY MANAGEMENT

AIM: To set up an Azure DevOps project for efficient collaboration and agile work management.

STEPS:

1.Create An Azure Account

2.Create the First Project in Your Organization

- After the organization is set up, you'll need to create your first **project**. This is where you'll begin to manage code, pipelines, work items, and more.
- On the organization's **Home page**, click on the **New Project** button.
- Enter the project name, description, and visibility options:

Name: Choose a name for the project (e.g., LMS).

Description: Optionally, add a description to provide more context about the project.

Visibility: Choose whether you want the project to be **Private** (accessible only to those invited) or **Public** (accessible to anyone).

- Once you've filled out the details, click **Create** to set up your first project.

The screenshot shows the Azure DevOps Organization Home page. On the left, there's a sidebar with organization names: jananikumar29010702 (selected), jananikumar29010547, jananikumar2901, and sjoshika20040630. Below this are links for '2 more organizations' and 'New organization'. The main area features a central illustration of a person sitting on the ground with a dog, surrounded by clouds. To the right, there's a 'Create a project to get started' section. It includes fields for 'Project name' (set to 'Evaluation of Academic Performance'), 'Description' (empty), and 'Visibility'. Under 'Visibility', the 'Public' option is selected, showing a description about public visibility. The 'Private' option is also shown, indicating that only people you give access to will be able to view the project. A note at the bottom states that public projects are disabled for the organization. There's also an 'Advanced' button. At the bottom right is a blue 'Create project' button.

3. Once logged in, ensure you are in the correct organization. If you're part of multiple organizations, you can switch between them from the top left corner (next to your user profile). Click on the Organization name, and you should be taken to the Azure DevOps Organization Home page.

The screenshot shows the Azure DevOps Organization Home page. On the left, there's a profile section for 'Janani K' with a green circular icon containing 'JK', an email address (jananikumar2901@gmail.com), and a location (India). Below this is a 'Visual Studio Dev Essentials' section with a description and a 'Use your benefits' link. The main area is titled 'Azure DevOps Organizations' and shows a list of organizations. The first organization listed is 'dev.azure.com/jananikumar2901' (Owner), which has two projects: 'Evaluation of Academic Performance' and 'The Evaluation of Academic Performance'. There's a 'New project' link. To the right of the projects is an 'Actions' section with a 'Open in Visual Studio' link. Below this are other organization entries: 'dev.azure.com/jananikumar29010507' (Owner), 'dev.azure.com/jananikumar29010547' (Owner), 'dev.azure.com/jananikumar29010602' (Owner), 'dev.azure.com/jananikumar29010702' (Owner), and 'dev.azure.com/sjoshika20040630' (Member). At the top right, there's a 'Create new organization' button. The top navigation bar shows the URL 'aex.dev.azure.com/me?mkt=en-US' and the Microsoft logo.

4.Project dashboard

The screenshot shows the Azure DevOps project dashboard for 'Evaluation of Academic performance'. The left sidebar includes links for Overview, Summary, Dashboards, Wiki, Boards, Pipelines, Artifacts, and Project settings. The main content area displays the 'Evaluation of Academic performance' page with sections for 'About this project' and 'Project stats'. The 'About this project' section describes the system's purpose of managing student academic records and generating reports. The 'Project stats' section shows 0 work items and 5 members (JG, JK, S, J, KM). A message at the top indicates limited features for Stakeholder access.

5.To manage user stories:

- From the **left-hand navigation menu**, click on **Boards**. This will take you to the main **Boards** page, where you can manage work items, backlogs, and sprints.
- On the **work items** page, you'll see the option to **Add a work item** at the top. Alternatively, you can find a + button or **Add New Work Item** depending on the view you're in.
From the **Add a work item** dropdown, select **User Story**. This will open a form to enter details for this user story.

The screenshot shows the Azure DevOps interface for a project titled "The Evaluation of Academic Performance Team". The left sidebar navigation includes "Overview", "Boards", "Work items", "Backlogs" (selected), "Sprints", "Queries", "Delivery Plans", "Analytics views", "Repos", "Pipelines", "Test Plans", "Artifacts", and "Project settings". The main content area displays the backlog with two items:

Order	Work Item Type	Title	State	Effort	Business Value
1	Epic	> Academic Records Management	New	Business	Business
2	Epic	> Attendance and Communication Management	New	Business	Business

To the right of the backlog, there is a "Planning" section with a message: "Drag and drop work items to include them in a sprint." It shows three iterations: "Iteration 1" (Planned Effort: 0, 8 items), "Iteration 2" (No work scheduled yet), and "Iteration 3" (No work scheduled yet). A "+ New Sprint" button is located at the bottom of the planning section.

RESULT: Successfully created an Azure DevOps project with user story management and agile workflow setup.

Exp.No: 3
Date: 14/02/2025

SETTING UP EPICS FEATURES AND USER STORIES FOR PROJECT PLANNING

AIM: To learn about how to create epics, user story, features, backlogs for your assigned project.

1. Fill in Epics

The screenshot shows the Azure DevOps interface for creating an Epic. The URL in the address bar is dev.azure.com/jananikumar29010547/The%20Evaluation%20of%20Academic%20Performance/_backlogs/backlog/The%20Evaluation%20of%20Academic%20Performance%20Team/Epics?worki... . The main title is "EPIC 1" under the heading "1 Academic Records Management". The "Description" field contains the placeholder "Click to add Description.". The "Planning" section includes fields for Priority (set to 2), Risk, Effort, Business Value, and Time Criticality. The "Deployment" section provides instructions on tracking releases. The "Development" section includes an "Add link" button and a note about linking to Azure Repos. The "Related Work" section is currently empty. On the left sidebar, there are links for Boards, Backlogs, Queries, Deliverables, Analytics, Reports, Pipelines, Tests, and Artifacts. The "Project settings" link is at the bottom left.

2.Fill in Features

A screenshot of the Azure DevOps interface showing the creation of a Feature. The URL is dev.azure.com/jananikumar29010547/The%20Evaluation%20of%20Academic%20Performance/_backlogs/backlog/The%20Evaluation%20of%20Academic%20Performance%20Team/Epics?worki... . The page title is "FEATURE 4". The main content area shows a feature titled "4 Grade Entry and Modification". It includes sections for Description, Planning, Deployment, and Development. The "Description" section has a placeholder "Click to add Description." The "Planning" section shows Priority set to 2, Risk, and Effort. The "Deployment" section provides instructions on tracking releases. The "Development" section includes a "Add link" button and a tooltip about linking to Azure Repos. The "Related Work" section is currently empty.

3.Fill in User Story Details

A screenshot of the Azure DevOps interface showing the creation of a User Story. The URL is dev.azure.com/jananikumar29010547/The%20Evaluation%20of%20Academic%20Performance/_backlogs/backlog/The%20Evaluation%20of%20Academic%20Performance%20Team/Epics?worki... . The page title is "USER STORY 8". The main content area shows a user story titled "8 As a Teacher, I want to enter student grades for assignments, exams, and projects so that I can evaluate their performance.". It includes sections for Description, Planning, Deployment, Acceptance Criteria, Classification, and Development. The "Description" section has a placeholder "Click to add Description.". The "Acceptance Criteria" section has a placeholder "Click to add Acceptance Criteria.". The "Classification" section shows Value area set to Business. The "Development" section includes a "Add link" button and a tooltip about linking to Azure Repos. The "Related Work" section is currently empty.

4.Fill in Task Details

The screenshot shows the Azure DevOps interface for a task titled 'TASK 24'. The task details are as follows:

- Description:** Click to add Description.
- Planning:** Priority: 2, Activity: None.
- Deployment:** To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#).
- Effort (Hours):** Original Estimate: None, Remaining: None, Completed: None.
- Development:** Add link: Link an Azure Repos [commit](#), [pull request](#) or [branch](#) to see the status of your development. You can also [create a branch](#) to get started.
- Implementation:** Integrated in Build.
- Related Work:** Add link: Parent.

RESULT: Thus, the creation of epics, features, user story and task has been created successfully.

Exp.No: 4
Date: 20/03/2025

SPRINT PLANNING

AIM: To assign user story to specific sprint for the Online Banking Project.

SPRINT PLANNING

Sprint 1

The screenshot shows the Azure DevOps Taskboard for the 'Evaluation of Academic performance Team'. The board is set up for 'Iteration 1' and shows two user stories under the 'Person: All' column. Story 32 and Story 31 are both listed as 'New' tasks. Story 32 describes the desire to send messages to teachers or administrators. Story 31 describes the desire to view academic performance. The board also includes columns for 'Active', 'Resolved', and 'Closed'.

Sprint 2

The screenshot shows the Taskboard view for the 'Evaluation of Academic performance Team' sprint. The board has five columns: New, Active, Resolved, and Closed. Under the 'Iteration 1' filter, there are two items in the 'New' column:

- Item 32:** As a Parent, I want to send messages or concerns to teachers or administrators so that I can communicate directly about my child's education.
Status: New
Assigned To: Jayasurya J
- Item 55:** Create a feature that allows parents to send messages or concern directly to teachers or administrators about their child's education.
Status: New
Assigned To: Jayasurya J

Sprint 3

The screenshot shows the Backlog view for the 'Evaluation of Academic performance Team' sprint. The backlog table includes columns for Order, Title, State, and Assigned To. The items listed are:

Order	Title	State	Assigned To
1	As a Parent, I want to send messages or concerns to teacher...	New	Jayasurya J
2	As a Parent, I want to view my child's academic performanc...	New	Jayasurya J
3	As a Parent, I want to receive notifications about my child's ...	New	Jayasurya J

8	The administrator can log in and access grading settings.	New	Kanish Kumar M
9	As an Administrator, I want to monitor teacher activity so th...	New	Janani K

Sprint 4

The screenshot shows the Azure DevOps interface for the 'Evaluation of Academic performance Team' project. The left sidebar navigation includes 'Evaluation of Academic...', 'Overview', 'Boards', 'Work items', 'Backlogs', 'Sprints' (which is selected), 'Queries', 'Delivery Plans', 'Analytics views', 'Repos', 'Pipelines', 'Test Plans', and 'Artifacts'. The main area displays a backlog titled 'Iteration 1' with 14 items. The columns are Order, Title, State, and Assigned To. The items are as follows:

Order	Title	State	Assigned To
1	> As a Parent, I want to send messages or concerns to teacher... (New)	New	Jayasurya J
2	> As a Parent, I want to view my child's academic performanc... (New)	New	Jayasurya J

13	As a Student, I want to track my academic progress over ti... (New)	New	Janani G
14	> As a Student, I want to generate a report showing my grade... (New)	New	Janani G

RESULT: The Sprints are created for the Evaluation of Academic Performance Project.

Exp.No: 5	
Date: 28/03/2025	POKER ESTIMATION

AIM: Create Poker Estimation for the user stories - Online Banking System Project.

POKER ESTIMATION

The screenshot shows the Azure DevOps interface for a project titled "The Evaluation of Academic Performance". A specific work item, "USER STORY 19", is selected. The story is described as: "As a student, I want to generate a report comparing my grades to class averages." It is currently in the "New" state. Planning details include Story Points (2d), Priority (2), and Risk (R). The Acceptance Criteria listed are: "1. Reports must anonymize individual peers (show only averages)." and "2. Students can select subjects/semesters for comparison." The Development section indicates the work area is "Business". A note in the Development section says: "To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#)".

RESULT: The Estimation/Story Points is created for the project using Poker Estimation.

DESIGNING CLASS AND SEQUENCE DIAGRAMS FOR PROJECT ARCHITECTURE

Date: 04/04/2025

AIM: To Design a Class Diagram and Sequence Diagram for the given Project.

6A. CLASS DIAGRAM

6B.SEQUENCE DIAGRAM

RESULT: The Class Diagram and Sequence Diagram is designed Successfully for the Evaluation of Academic Performance Project.

Exp.No: 7

Date: 16/04/2025

DESIGNING ARCHITECTURAL AND ER DIAGRAMS FOR PROJECT STRUCTURE

AIM: To Design an Architectural Diagram and ER Diagram for the given Project.

7A. ARCHITECTURAL DIAGRAM

7B. ER DIAGRAM

RESULT: The Architecture Diagram and ER Diagram is designed Successfully for the Evaluation of Academic Performance Project.

Exp.No: 8	TESTING-TEST PLANS AND TEST CASES
Date: 18/04/2025	

AIM: Test Plans and Test Case and write two test cases for at least five user stories showcasing the happy path and error scenarios in azure DevOps platform.

TEST PLANNING AND TEST CASE

Test Case Design Procedure

1. Understand Core Features of the Application

- Student Authentication (Login, Forgot Password, MFA)
- Grade Entry and Evaluation
- Attendance Monitoring and Reports
- Feedback Management (View/Add/Edit Feedback)
- Report Card Generation (Download/Email)
- Academic Trend Tracking (Graphs/Charts by Term)
- Admin Settings for Grading Policy and Weightage

2. Define User Interactions

Each test case reflects realistic user actions:

- Logging in securely
- Viewing and tracking grades
- Teachers entering grades and attendance
- Students downloading performance reports
- Admins updating grading criteria

3. Design Happy Path Test Cases

- Focused on successful flows where inputs are valid and systems behave as expected.
- Examples:
 - Student logs in with valid credentials
 - Teacher enters grades successfully
 - Student downloads report card with accurate data

4. Design Error Path Test Cases

- Focused on handling invalid, missing, or unexpected inputs.
- Examples:
 - Login fails due to incorrect password
 - Grade entry fails due to missing assessment type
 - Report generation blocked due to incomplete data

5. Break Down Steps and Expected Results

Each test case includes:

- Clear step-by-step actions
- Specific expected results for each step
 - This ensures reproducibility and easy automation later.

6. Use Clear Naming and IDs

- Example:
 - TC01 – Login with Valid Credentials
 - TC05 – Grade Entry Blocked (Missing Weightage)
 - TC11 – Attendance Report Generated Successfully
- Helps trace test cases to user stories and features in Azure DevOps

7. Separate Test Suites

Organize test cases based on functional modules:

- TS01 – StudentAuthentication

- TS02 – Grades & Evaluation
- TS03 – Attendance Monitoring
- TS04 – Feedback & Reports
- TS05 – Admin Settings & Performance Tracking

1.New test plan

 New Test Plan

Name *

Area Path *

Iteration *

Create

Cancel

2.Test suite

The screenshot shows the Azure DevOps interface for a project titled "Evaluation of Academic performance". The left sidebar has "Test Plans" selected. A modal window is open for a user story titled "11 : As a teacher, I want to mark daily attendance (Present/Absent/Late) for my classes. (ID: 46)". The modal has tabs for "Execute" and "Chart". Under "Execute", there is a table for "Test Points (3 items)".

Title	Outcome	Count
TC08 - Mark Attendance for All Students in a Class	Passed	1
TC09 - Attempt to Submit Attendance Without Selecting Status	Failed	2
TC10 -View and Edit Previously Marked Attendance	Passed	3

3.Test case

Give two test cases for at least five user stories showcasing the happy path and error scenarios in azure DevOps platform.

Online Banking System– Test Plans

User Stories – Banking Application

- **US32:** As a Parent, I want to send messages or concerns to teachers or administrators so that I can communicate directly about my child's education.
- **US23:** As an Administrator, I want to manage user roles (student, teacher, parent) so that access is properly controlled.
- **US19:** As a Student, I want to generate a report showing my grades and attendance so that I can share it with my parents or guardians. .
- **US07:** As a teacher, I want to enter grades for assignments, exams, and projects in a centralized system.

TS01 TEST SUITE:MESSAGE FUNCTIONALITY

User Story: As a Parent, I want to send messages or concerns to teachers or administrators so that I can communicate directly about my child's education.

Test case:TC01-Send a Message to a Teacher

Steps and Expected Results:

- **Action:** Log in as a Parent and navigate to the "Messages" section.

Expected Result: Message interface with list of teachers is displayed.

- **Action:** Select a teacher, type a subject and message body.

Expected Result: Input fields are filled and active, no errors shown.

- **Action:** Click the "Send" button.

Expected Result: Message is sent successfully, confirmation appears: "*Message sent successfully.*"

Test Case: TC02 -Receive a Reply from a Teacher

Steps and Expected Results:

- **Action:** Log in as a Parent and go to the "Inbox" or "Messages" section.

Expected Result: List of message threads is displayed.

- **Action:** Open a message thread with a teacher.

Expected Result: Full conversation history is visible in chronological order.

- **Action:** Check for new message or reply from teacher.

Expected Result: Reply is displayed with timestamp and sender information.

TS02 TEST SUITE: ADMIN ACCESS CONTROL

User story: As an Administrator, I want to manage user roles (student, teacher, parent) so that access is properly controlled.

Test Case: TC01- Assign a Role to a New User

Steps and Expected Results:

- **Action:** Log in as Administrator and navigate to the "User Management" section.
Expected Result: User management dashboard is displayed with options to add users.

- **Action:** Click "Create New User", fill in user details, and select **Student** as role.
Expected Result: All required fields are validated and role dropdown is active.

- **Action:** Click "Save" to create the user.

Expected Result: New user is created with the **Student** role and a success message appears: "*User created and role assigned successfully.*"

Test Case: TC02 - Change Role of an Existing User

Steps and Expected Results:

- **Action:** Log in as Administrator and search for a user with the role **Parent**.
Expected Result: User details are displayed with current role information.

- **Action:** Click "Edit", change the role from **Parent** to **Teacher**.
Expected Result: Role dropdown is active and editable.

- **Action:** Click "Save Changes".

Expected Result: User role is updated successfully and confirmation appears: "*User role updated successfully.*"

TS03 TEST SUITE: Grade Entry and Management

User Story: As a teacher, I want to enter grades for assignments, exams, and projects in a centralized system.

Test Case:TC01- Enter Grades for an Assignment

Steps and Expected Results:

- **Action:** Log in as a Teacher and go to the "Gradebook" section.

Expected Result: A list of classes and grading options is displayed.

- **Action:** Select a class and choose an assignment from the list.

Expected Result: A grading entry form appears with student names.

- **Action:** Enter grades for all students and click "Save."

Expected Result: Grades are saved, and a confirmation message appears: "*Grades saved successfully.*"

Test Case: TC02 - Submit Incomplete Grades

Steps and Expected Results:

- **Action:** Navigate to the exam grading page for a class.

Expected Result: The grade entry screen for the exam is displayed.

- **Action:** Enter grades for some students, leave others blank.

Expected Result: Blank fields are highlighted or flagged.

- **Action:** Click "Save."

Expected Result: Error message appears: "*Please complete all fields or mark as 'Not Submitted'.*"

Grades are not saved

TS04 TEST SUITE: Student Report Generation

User Story: As a Student, I want to generate a report showing my grades and attendance so that I can share it with my parents or guardians.

Test Case: TC01- Generate Grades and Attendance Report

Steps and Expected Results:

- **Action:** Log in as a Student and go to the “Reports” section.

Expected Result: The report generation interface is displayed with options for report type.

- **Action:** Select "Grades & Attendance" and a time period (e.g., Term 1).

Expected Result: A preview or selection confirmation is shown.

- **Action:** Click the “Generate” button.

Expected Result: A report is generated with accurate grade and attendance data and an option to download or share.

Test Case: TC02 - Attempt to Generate Report with No Data

Steps and Expected Results:

- **Action:** Log in as a Student and navigate to the “Reports” section.

Expected Result: Report options are visible.

- **Action:** Select a date range or term with no recorded data.

Expected Result: System indicates no data is available.

- **Action:** Click “Generate.”

Expected Result: Message shown: “*No data available to generate report.*” No report is created.

TEST CASE 42

42 TC06 - Generate Grades and Attendance Report Successfully

sjoshika2004 0 Comments Add Tag

State: Design **Area:** Evaluation of Academic performance

Reason: New **Iteration:** Evaluation of Academic performance\Iteration 1

Steps:

Steps	Action	Expected result
1.	Log in as a Student.	
2.	Navigate to the Reports section and select "Generate Report."	A report is generated showing the student and attendance records.
3.	Choose "Grades & Attendance" and click "Generate."	The report is viewable on screen and (PDF or Excel).

Confirmation message appears: "Report generated successfully."

Deployment: To track releases associated with this work item, go to [Releases](#) and turn on deployment status reporting for Boards in your pipeline's Options menu. [Learn more about deployment status reporting](#)

Overview

5. Running the test cases

The screenshot displays two windows related to Azure Test Plans.

Top Window: A browser window titled "Evaluation of Academic performance" showing the "Test Points (3 items)" for test case ID 46. The table lists three test points:

Title	Outcome	Order	Test Case Id	Configuration	Tester
TC08 - Mark Attendance for All Students in a Class	Passed	1	45	Windows 10	sjoshika2004
TC09 - Attempt to Submit Attendance Without Selecting Status	Failed	2	47	Windows 10	sjoshika2004
TC10 -View and Edit Previously Marked Attendance	Passed	3	48	Windows 10	sjoshika2004

Bottom Window: A "Runner - Test Plans - Google Chrome" window showing a test step for test case 42: "TC06 - Generate Grades and Attendance Report Successfully". The step details are as follows:

- Log in as a **Student**.
- Navigate to the **Reports** section and select "**Generate Report**".
EXPECTED RESULT:
A report is generated showing the student's grades and attendance records.
- Choose "**Grades & Attendance**" and click "**Generate**".
EXPECTED RESULT:
The report is viewable on screen and downloadable (PDF or Excel).
Confirmation message appears: "Report generated successfully."

6.Recording the test case

Recording: 00:00 / 10:00 minutes

204: Fund Transfer-Valid Balance

1. ✓ Log in and go to the "Fund Transfer" section
EXPECTED RESULT
Fund Transfer page is displayed

2. Select source and destination accounts, enter valid amount
EXPECTED RESULT
Amount is accepted; no validation error

3. Click "Transfer" and confirm the transaction
EXPECTED RESULT
Success message is shown and balances are updated

Exp.No: 9	LOAD TESTING AND PERFORMANCE TESTING
Date: 25/04/2025	

AIM: To create an Azure Load Testing resource and run a load test to evaluate the performance of a target endpoint.

LOAD TESTING

Steps to Create an Azure Load Testing Resource:

Before you run your first test, you need to create the Azure Load Testing resource:

1. Sign in to Azure Portal
Go to <https://portal.azure.com> and log in.
2. Create the Resource
 - o Go to *Create a resource* → Search for “Azure Load Testing”.
 - o Select Azure Load Testing and click Create.
3. Fill in the Configuration Details
 - o *Subscription:* Choose your Azure subscription
 - o *Resource Group:* Create new or select an existing one.
 - o *Name:* Provide a unique name (no special characters).
 - o *Location:* Choose the region for hosting the resource.
4. (Optional) Configure tags for categorization and billing.
5. Click Review + Create, then Create.
6. Once deployment is complete, click Go to resource.

Azure Load Testing is a fully managed load-testing service that makes it easy to generate high-scale load and identify performance bottlenecks. [Learn more](#)

Project details
Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all your resources.

Subscription *: Azure for Students
Resource group *: (New) Evaluation_of_Academic_performance
Create new

Instance details
Name *: ACADEMICAPP
Region *: East Asia

Previous Next Review + create

Validation passed.

Basics
Subscription: Azure for Students
Resource group: Evaluation_of_Academic_performance
Name: ACADEMICAPP
Region: East Asia

Encryption
Encryption type: MMK

Previous Next Create

Steps to Create and Run a Load Test:

Once your resource is ready:

1. Go to your Azure Load Testing resource and click Add HTTP requests > Create.
2. Basics Tab o *Test Name*: Provide a unique name.
 - o *Description*: (Optional) Add test purpose.
 - o *Run After Creation*: Keep checked.

3. Load Settings o *Test URL*: Enter the target endpoint (e.g., <https://yourapi.com/products>).
4. Click Review + Create → Create to start the test.

The screenshot shows the Microsoft Azure Cloud Native Testing Overview page for a deployment named "Microsoft.CloudNativeTesting1748010570474". The deployment status is "Deployment succeeded". Deployment details include a name of "Microsoft.CloudNativeTesting1748010570474", a start time of "23/5/2025, 7:59:59 pm", a subscription of "Azure for Students", and a resource group of "Evaluation_of_Academic_performance". A Correlation ID is also listed: "ca13a218-740b-42a9-8b85-0946760c4...". Below the deployment summary, there are sections for "Deployment details" and "Next steps". A "Go to resource" button is visible. To the right, there are promotional cards for "Cost management", "Microsoft Defender for Cloud", and "Free Microsoft tutorials".

The screenshot shows the "Create a URL-based test" configuration page. The "Review + create" tab is selected. The "Basics" section contains the following configuration:

- Test tool: JMeter
- Test name: Test_5/23/2025_8:03:57 PM
- Test description: <https://yourapi.com/products>
- Debug mode: Disabled

The "Test plan" section includes:

- Test method: URL
- Requests: Request1
- Input data files: None

The "Load" section is currently empty. At the bottom, there are "Previous", "Next", and "Create" buttons.

Load Testing

The screenshot shows the 'StudentPerformanceTracker' application running on a Windows desktop. The main window title is 'StudentPerformanceTracker - Replit'. The dashboard features a dark blue header with the text 'Welcome, kavi' and 'Manage your class and student performance'. On the left, a sidebar menu for 'Academic System' includes 'Dashboard' (selected), 'Manage Marks', 'Attendance', 'Announcements', 'Schedule Meetings', and 'Logout'. The central area has three cards: 'Total Students' (4), 'Pending Evaluations' (8), and 'Parent Meetings' (0). Below these are two sections: 'Students Overview' (listing students by ID, name, class, and status) and 'Upcoming Meetings' (showing 'No upcoming meetings' with a 'Schedule Meeting' button). The taskbar at the bottom shows various pinned icons and the date/time: 01-05-2025, 09:05.

The screenshot shows the 'Manage Student Marks' page within the 'StudentPerformanceTracker' application. The main window title is 'StudentPerformanceTracker - Replit'. The page title is 'Manage Student Marks' with the sub-instruction 'Add, edit, and view student performance marks'. The sidebar menu is identical to the dashboard. The central area displays a table of student marks for the subject 'Physics'. The table columns are STUDENT ID, NAME, MARKS, ASSIGNMENT, and ACTIONS. The data rows are:

STUDENT ID	NAME	MARKS	ASSIGNMENT	ACTIONS
ST001	John Doe	87/100	80	
1	surya	85/100	50	
surya(1)	surya(1)	Not set	Not set	
ST002	jay	Not set	Not set	

The taskbar at the bottom shows various pinned icons and the date/time: 01-05-2025, 09:05.

RESULT: Successfully created the Azure Load Testing resource and executed a load test to assess the performance of the specified endpoint.

Exp.No: 10	GITHUB PROJECT STRUCTURE & NAMING CONVENTIONS
Date: 02/05/2025	

AIM: To provide a clear and organized view of the project's folder structure and file naming conventions, helping contributors and users easily understand, navigate, and extend the Evaluation of Academic Performance project.

GITHUB PROJECT STRUCTURE

The screenshot shows a GitHub repository page for 'Evaluation-of-Academic-Performance'. The repository is public and has 1 branch and 0 tags. The main branch has 2 commits. The commits are listed as follows:

- JananikumaresanN Add files via upload (2a68693 · now) - Create README.md (2 minutes ago)
- JananikumaresanN Add files via upload (now) - SC PROJECT REPORT (1).pdf
- JananikumaresanN Add files via upload (now) - StudentPerformanceTracker (1).zip
- JananikumaresanN Add files via upload (now) - azure account pics.zip
- JananikumaresanN Add files via upload (now) - diagrams.zip
- JananikumaresanN Add files via upload (now) - load testing.zip
- JananikumaresanN Add files via upload (now) - poker estimation.zip
- JananikumaresanN Add files via upload (now) - progress report.zip
- JananikumaresanN Add files via upload (now) - sprint planning.zip
- JananikumaresanN Add files via upload (now) - testing and test cases.zip

The repository has no description, website, or topics provided. It has 0 stars, 0 forks, and 0 watching. There are no releases or packages published.

RESULT: The GitHub repository clearly displays the organized project structure and consistent naming conventions, making it easy for users and contributors to understand and navigate the codebase.
